PROFESSIONAL SUMMARY

Motivated Software Engineering student and aspiring Full-Stack PHP/Laravel Developer with solid hands-on experience in frontend and backend web development. Proficient in building responsive, user-friendly web applications using HTML5, CSS3, Bootstrap, JavaScript, React, PHP, and Laravel. Demonstrates strong knowledge of CRUD application development, MVC architecture, and MySQL database design. Developed practical projects including a Student Registration System, a CMS Blog Platform, and a Fleet Management System. Committed to writing clean, efficient code and continuously expanding technical expertise through real-world project experience and professional internship training.

TECHNICAL SKILLS

Frontend Development	HTML5, CSS3, Bootstrap 5, JavaScript (ES6), React (Basic), Responsive Design
Backend Development	PHP, Laravel, MVC Architecture, RESTful APIs, Authentication
CRUD & Application Logic	Full CRUD Operations, Form Handling, Session Management
Database	MySQL, Database Design, Queries & Relationships
Programming Concepts	MVC Architecture, Problem Solving, CRUD Application Development, Database Design & Relationships, Data Structures & Algorithms (Basic)
Tools & Environment	Git, GitHub, XAMPP, VS Code
Soft Skills	Communication, Teamwork, Adaptability, Continuous Learning

PROFESSIONAL EXPERIENCE

Junior Laravel Developer TechVezoto (Jan 2026 – Present · 6 months)

- Contributed to the development and maintenance of a large-scale fleet management and telematics platform built with Laravel and MySQL, supporting GPS tracking, driver behaviour analytics, and real-time data processing.
- Developed and optimised RESTful API endpoints consumed by web dashboards and third-party integrations, ensuring reliable data delivery for fleet monitoring workflows.
- Assisted in implementing role-based access control (RBAC) and authentication features to secure multi-tenant admin panels used by fleet operators.
- Collaborated with senior developers on database schema design, query optimisation, and writing clean, well-structured Laravel controllers and Eloquent models.

Full-Stack Developer Intern UET Lahore (Oct 2025 – Dec 2025 · 3 months)

- Led the Laravel backend architecture for a full-featured CMS platform, designing RESTful routes, Eloquent models, and MVC-structured controllers to power a dynamic content management system.
- Built and integrated a widget-based page builder that enables non-technical users to create and publish blogs, articles, and fully customised websites by arranging pre-built content widgets — no coding required.
- Contributed to frontend development using HTML, CSS, Bootstrap, and JavaScript, and handled database design and MySQL integration to support scalable multi-role content workflows.
- Engineered and deployed a Student Registration System featuring full CRUD functionality, form validation, and database integration using MySQL.

Web Development Trainee NAVTTC Program (UET Lahore)

- Completed an intensive, government-certified 3-month web development program covering full-stack technologies including HTML, CSS, Bootstrap, JavaScript, PHP, Laravel, and MySQL.
- Designed and delivered multiple responsive web projects and CRUD-based applications, demonstrating proficiency across the complete web development stack.

C++ Instructor Computer Teacher (1 Year)

- Delivered comprehensive C++ instruction to matric-level students, covering syntax, data types, control flow, loops, functions, arrays, and object-oriented programming fundamentals.
- Designed structured lesson plans and hands-on coding exercises that progressively built students' problem-solving skills and prepared them for board-level computer science examinations.

PROJECTS

TechGV Fleet Management System

PHP | Laravel | MySQL | Python | JavaScript | REST APIs

- ▶ Built key modules of a large-scale fleet management and telematics platform processing high-volume GPS and vehicle data in real time, with features covering live vehicle tracking, trip history, geofencing, and driver behaviour scoring.
- ▶ Developed RESTful API endpoints in Laravel to ingest and expose GPS/telematics data, enabling seamless integration with mobile apps and third-party fleet dashboards.
- ▶ Implemented role-based access control (admin, fleet manager, driver) with Laravel middleware, securing sensitive vehicle and driver data across multi-tenant operator accounts.
- ▶ Designed and optimised MySQL database schema for vehicles, drivers, trips, GPS events, and alerts — applying indexing strategies to handle high-frequency data inserts efficiently.

CMS Portal

PHP | Laravel | MySQL | Blade | Tailwind CSS | Alpine.js

- ▶ Built a full-featured content management system in Laravel 13 allowing authenticated admins and editors to manage posts, pages, categories, tags, media, and global site settings from a dedicated admin panel.
- ▶ Implemented a JSON-driven visual page builder enabling non-technical users to construct public-facing web pages by composing content blocks and widgets configurable through site settings.
- ▶ Designed the full database schema with SEO metadata fields, slug generation, and draft/published/archived content states, and secured the admin area with role-based middleware and media upload validation.

Portfolio Website

HTML | CSS | Bootstrap | JavaScript

- ▶ Designed and developed a fully responsive personal portfolio website showcasing projects, skills, and professional background using clean, modern UI practices.
- ▶ Optimised layout for multiple screen sizes using Bootstrap's grid system and custom CSS, ensuring a polished user experience across devices.

Real-Time Form Validation

HTML | CSS | Bootstrap | JavaScript

- ▶ Built a client-side form validation system using vanilla JavaScript, providing real-time user feedback on input errors without page reloads.
- ▶ Implemented regex-based field validation for email, phone, and required fields, significantly improving data quality and user experience.

Basic Calculator

HTML | CSS | Bootstrap | JavaScript

- ▶ Developed a fully functional browser-based calculator with support for basic arithmetic operations, styled with a clean, modern interface.

EDUCATION

Bachelor of Science in Software Engineering (Currently Enrolled)

Virtual University of Pakistan Lahore

Intermediate Degree

Punjab Board Lahore

TRAINING & CERTIFICATIONS

- | | | |
|---|------------|------|
| • Full-Stack Developer Internship Certificate | UET Lahore | 2026 |
| • NAVTTC Web Development Training | UET Lahore | 2026 |
| • Hifz-ul-Quran | | 2017 |

INTERESTS

- Learning new web technologies
- Building full-stack web projects
- Exploring backend architecture
- Problem solving & coding challenges

- Reading about technology trends
